Milestone 3 – Project Report

Due Date: 13/11/2026, 3pm via the Blackboard site
Weighting: 15%
Team Work

Deliverable:

A report on a prescribed format (~3000 words). Attach user research material and data as appendices (no word/page limit). You must acknowledge if you used any use generative AI tools (e.g. ChatGPT). In this case, a sharable public link of your chat should be added to an "AI Acknowledgement" section. The final report should have the following contents:

a. Main report + Appendices, in an ACM SIGCHI format (available on the Blackboard site). Main report should be around ~3000 words; appendices have no word or page limit. Use APA referencing style.
b. Academic Integrity Statement (available on the Blackboard site) must be signed by all the team members and added as the first page of your report.
c. Attach evidence of your work, i.e., user data such as interview transcripts, photos, and other forms of evidence added in appendices.
d. Attach signed Ethics Forms (available on the Blackboard site) in the appendices of the report.
e. The main report should be structured as following

Title and Student Names	● Give a meaningful title to your report and add you full names, student IDs and UQ email addresses
Abstract	● Give an overall highlight and summary of your report
Introduction	● Provide an overview of the overall premise. Introduction should clearly express the purpose, objective and scope of the work. ● Describe problem domain, aims and objectives, methodology, and summary of findings
Design Process	● Describe your design approach including user research, prototyping, and evaluation; focus on the outcomes of these methods ● Provide justification on selecting specific methods
Discussion & Conclusion	● Discuss your findings and justify significance of your results ● Draw your report together in a short conclusion.
Appendices	● Show the evidence of your study e.g. interview transcripts, photos from the field, other material, etc.

Assessment Criteria:

Report Content	**7 – High Distinction**	**6 – Distinction**	**5 – Credit**	**4 – Borderline Pass**	**3 or Less – Fail**
Writing and Presentation	Excellent logical structure, physical layout and appropriate attention to detail. The work is presented in an accurate, concise and coherent fashion.	Very good logical structure, physical layout and attention to detail. The work is presented in an	Good structure, physical layout. Some minor inaccuracies in presentation of work.	Acceptable structure and physical layout; Some inaccuracies or lack of detail in presentation of work.	Structure and physical layout very poor; presentation of work is inaccurate and incomplete.

10%	No spelling mistakes or grammar errors. Appropriate referencing to a correctly formatted bibliography. Appropriately acknowledges the work of others.	accurate and coherent fashion. Minimal spelling mistakes or grammar errors. Appropriate referencing to a correctly formatted bibliography. Appropriately acknowledges the work of others.	Neat, occasional spelling mistakes or grammar errors. Few errors in referencing. Appropriately acknowledges the work of others.	Neat, some spelling mistakes or grammar errors. Some errors in referencing or bibliography formatting. Appropriately acknowledges the work of others.	Numerous spelling mistakes or grammar errors. Several errors in referencing or bibliography formatting. Many failures to appropriately acknowledge the work of others
Abstract and Introduction 10%	Excellent, clear definition of a substantial and significant project area. Introduction provides an excellent overview of the design project. The abstract accurately yet concisely captures the topic, methods and outcomes.	Very good definition of problem area. Introduction clearly gives a big picture of the design project. The abstract accurately captures the topic, methods and outcomes.	Good definition of problem area. Introduction clearly gives a big picture of the design project. The abstract captures the topic and outcomes.	Satisfactory definition of the topic The overall purpose and a big picture of the design project is not well articulated. The abstract satisfactorily captures the topic and outcomes	Topic and scope of the project are very unclear. The introduction and abstract do not summarise the design project and its outcomes.
Design process 50%	Overall design approach and methods are systematically applied. Your user research highlights novel and insightful findings around the given topic.	A clearly set out design approach and methods systematically applied. Your user research findings are clearly described and provide logical insights.	Some inaccuracies in the application of design methods. Your user research findings are described comprehensively.	The design approach is reasonably systematic. Your user research findings lacked depth and did not have believability.	The design approach is haphazard, and has no logical basis. User research findings are very superficial and do not add any new knowledge to

	The description of your prototyping and evaluation process is excellent and has a strong connection with your user research findings The overall execution indicates a substantial design effort. The appendices show ample evidence about the quality of your work.	The description of your prototyping and evaluation process is excellent and has a strong connection with your user research findings The overall execution shows a good effort. The appendices show reasonable evidence about the quality of your work.	Your prototyping and evaluation process needed a bit more clarity; it did have a good connection with your user research findings The overall execution shows a good effort. The appendices show weak evidence about the quality of your work.	Your prototyping and evaluation process are weakly described and connection to your user research findings are not strong enough. The overall execution shows insufficient effort. The appendices show minimal evidence about your work.	the area being designed for. No or little indication of prototyping and evaluation The overall execution shows insufficient effort. No appendices are attached.
Discussion & Conclusion 30%	The analysis of the work conducted highlights your comprehension and shows insight into the significance of the results. The project concludes with a clear concise summary of the outcomes – in context of specified topic.	The analysis of the work conducted shows some insight into the significance of the results. The project concludes with a clear summary of the outcomes.	The analysis of the work conducted shows comprehension of the work but limited insight into the significance of results. The project concludes with a summary of the outcomes.	The analysis of the work conducted demonstrates some comprehension. The project concludes with a high-level summary of outcomes.	Poor review of the work and no real comprehension demonstrated. Conclusion fails to explain what was achieved.
